

CAT5E UTP patchcords

Patch cable, UTP version, category 5E. The conductor cross-section is AWG24. The connector contacts are covered with a 50µm layer of gold. Patch cables are part of a comprehensive system of products for structured cabling.

There are several common lengths of patch cables to choose from. All cables are certified according to internationally recognized standards. Thanks to the use of high-quality material, they are characterized by excellent transmission parameters and long service life.

|---------------------|---------------------------------------|
| PartNo | DW-U5E-xxx |
| Category | CAT5E |
| Bandwidth | 100 MHz |
| Ethernet support | 1000 Base-T |
| Conductor wire size | 24AWG |
| Length | 0.25m – 20m |
| Material coat | LSOH |
| Colour | Yellow, White, Red, Green, Blue, Grey |
| Contact plating | 50µm gold |
| Conductor type | Copper stranded wire |
| Cable diameter | 5,3 mm |
| Shielding type | U/UTP |
